06/25/15	Daily NWS Threat Brief for Tuesday, June 25, 2015 for FEMA Region 6

# Weather Forecast

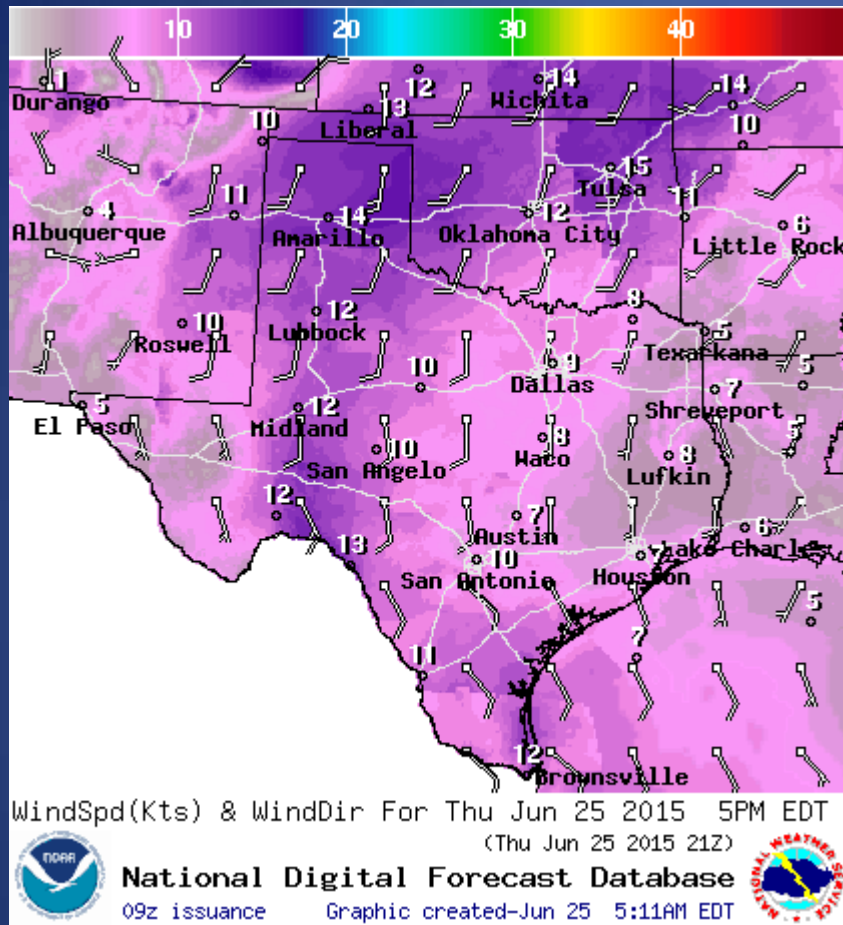

## Highs

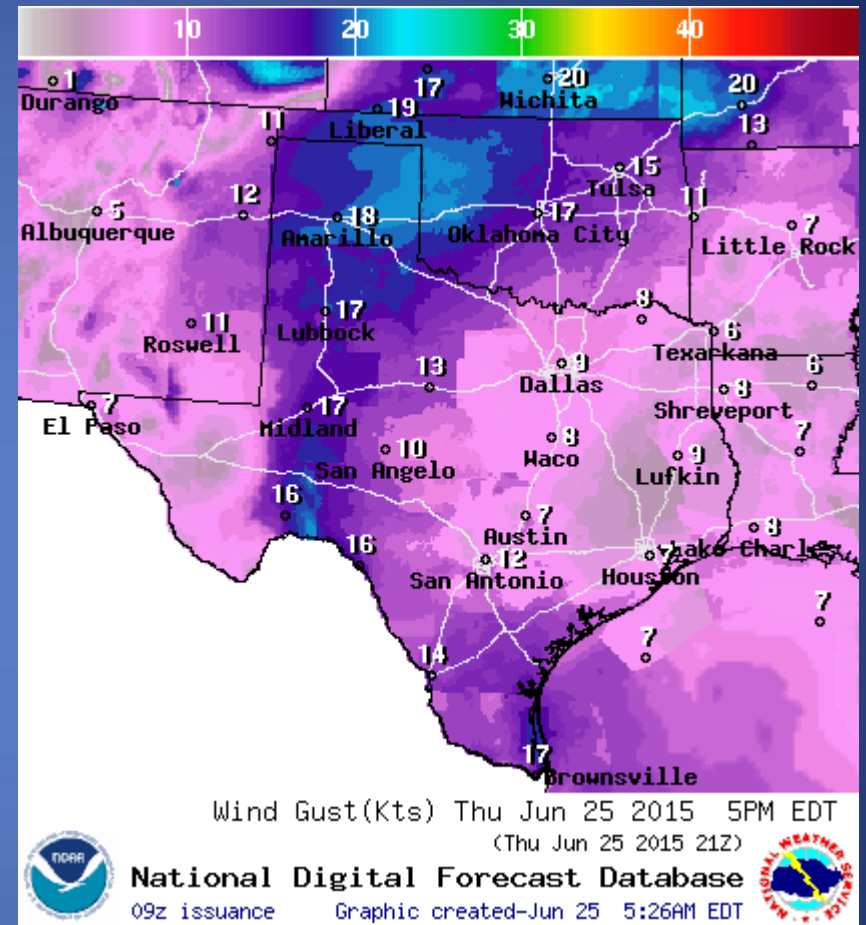

## Lows

# Weather Forecast

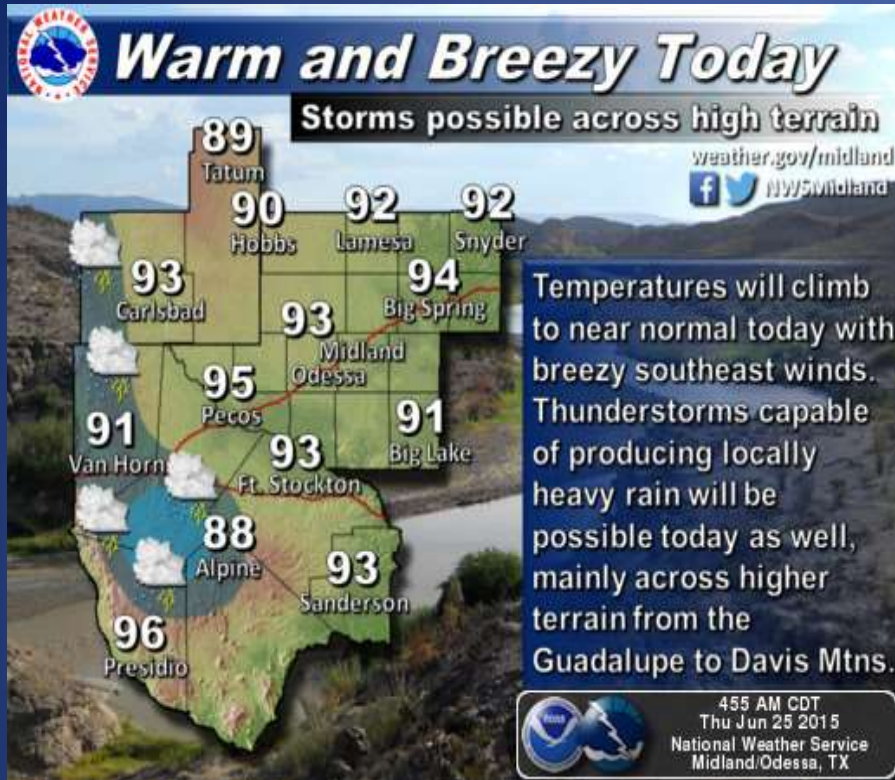

## Wind Speeds

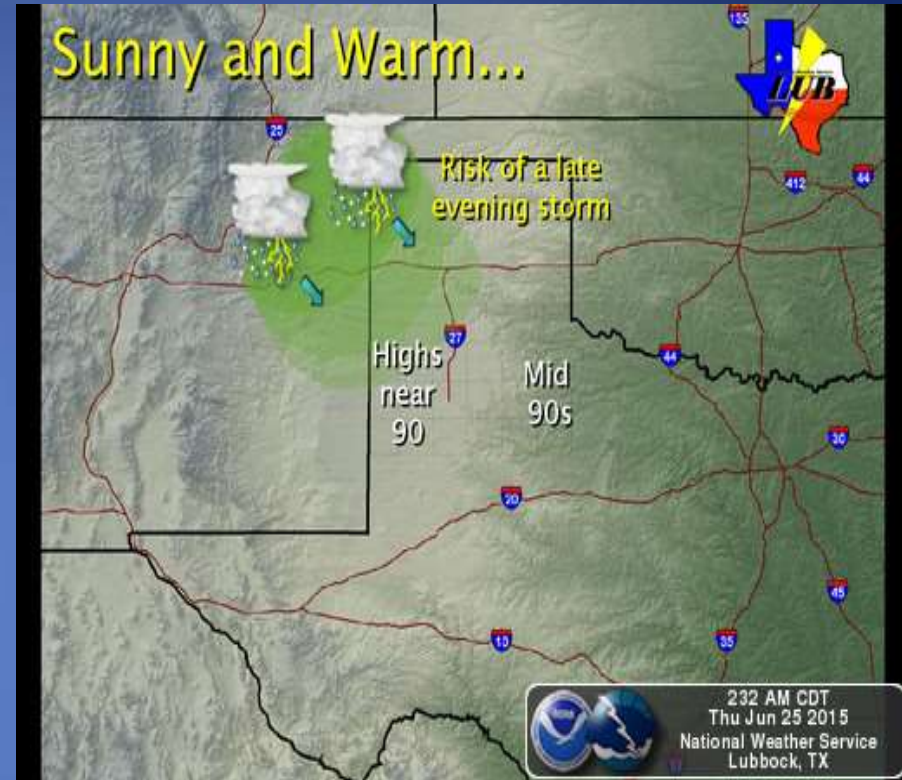

## Gusts

# Hazardous Weather

It will be seasonably warm and breezy today, with thunderstorms possible mainly across the higher terrain from the Guadalupe Mountains south to the Davis Mountains and Marfa Plateau. Storms that develop will be capable of producing locally heavy rainfall.

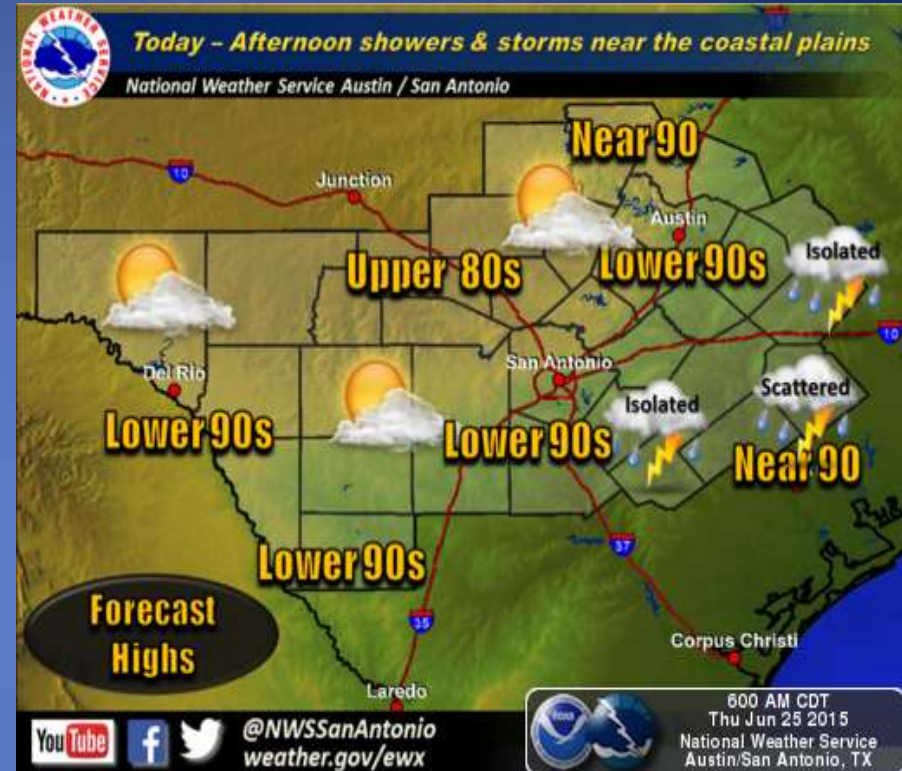

Another warm and sunny summer day is expected. Thunderstorms will develop across northeastern New Mexico after lunch and slowly drift southeastward. They may hold together long enough to affect portions of our area. Highs today near 90 with slightly higher temps across the Rolling Plains.

# Hazardous Weather

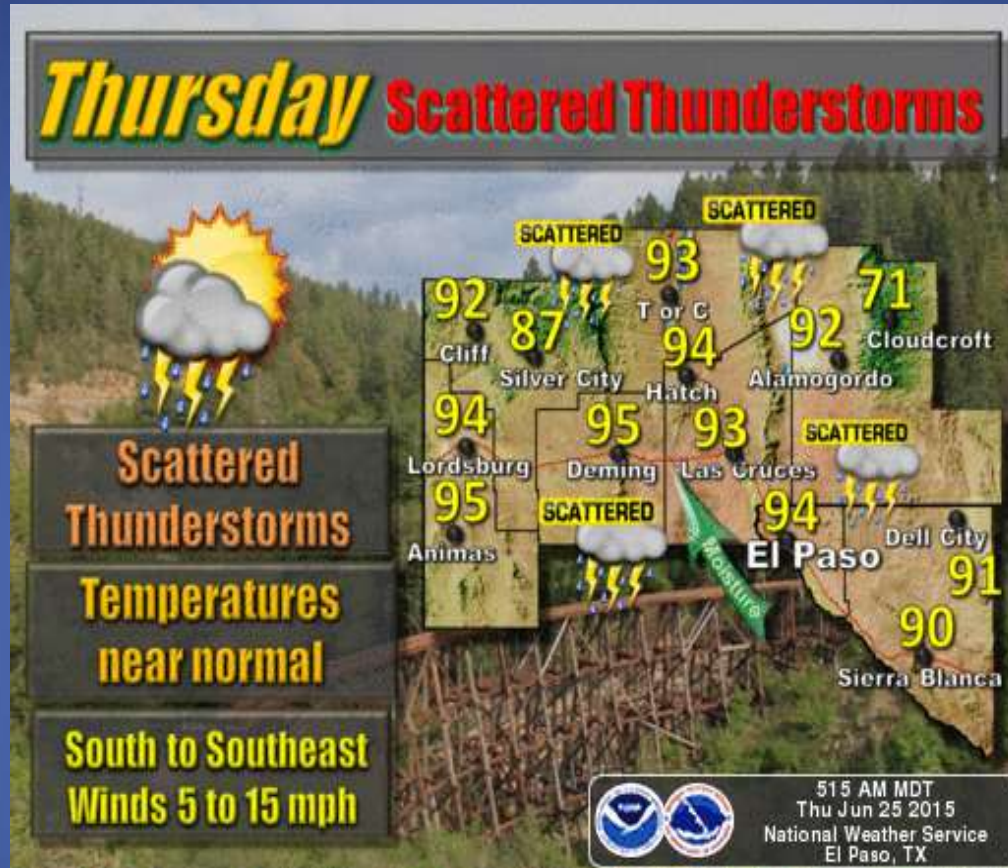

Isolated to scattered showers and thunderstorms will be possible across much of South Texas today. Afternoon temperatures will be in the lower 90s along the Coastal Bend and inland areas, to the mid 90s over the western Brush Country and Rio Grande Plains.

Isolated to scattered showers and thunderstorms will be possible today near the coastal plains. Elsewhere, dry weather is expected. High temperatures will range from the upper 80s to lower 90s.

# Hazardous Weather

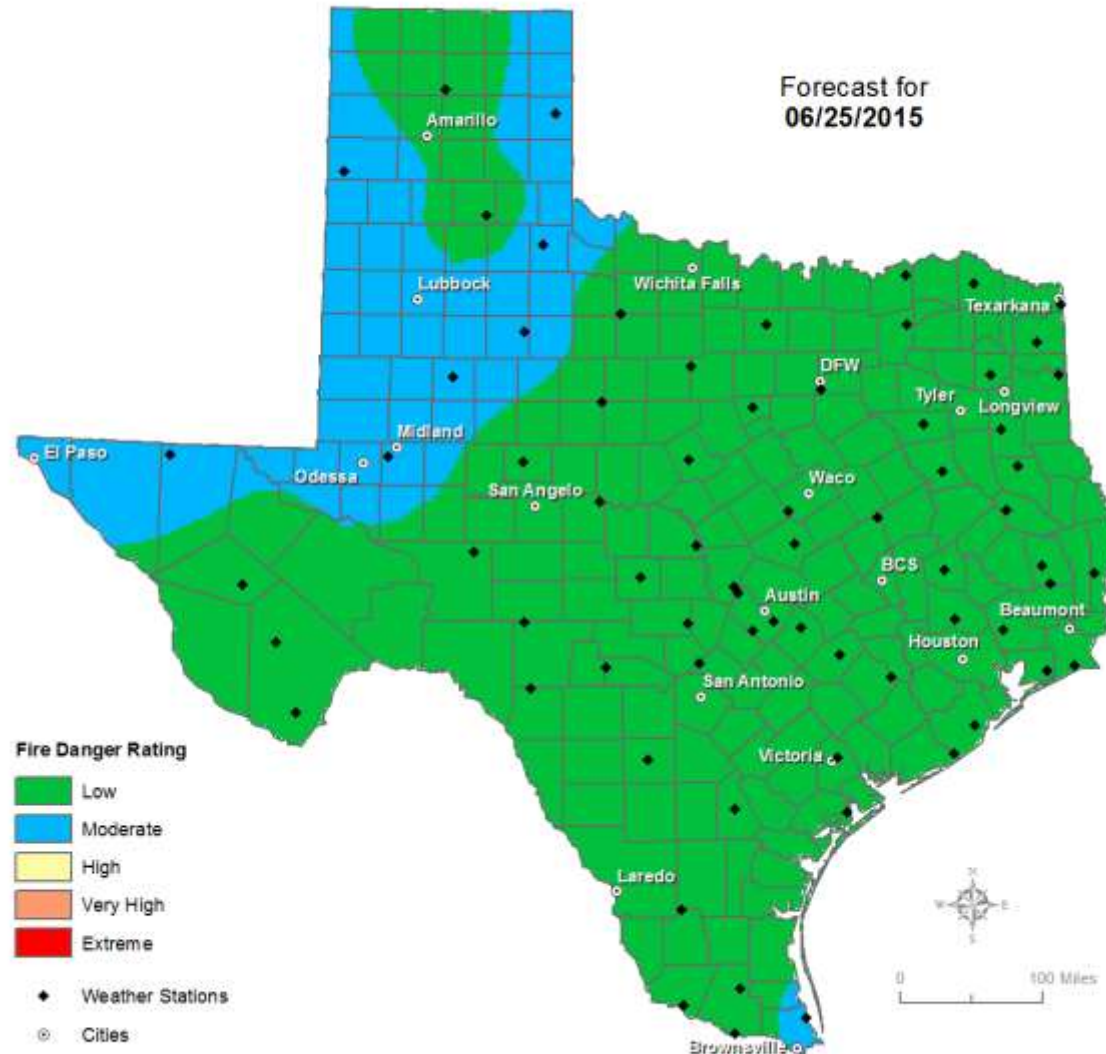

South to southeast winds will push moist unstable air into southern New Mexico and west Texas on Thursday causing scattered showers and thunderstorms across the region. Skies will be partly to mostly cloudy with high temperatures around 90 to 95 lowlands and 70s and 80s mountains.

# Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
